PROJECT REPORT

Description of Project:

The main motto of the Project is create a web application like shopping cart in a different way for IIITB that is IIITB CAFETERIA. Which gives the features like adding the items present in cafeteria.

User Requirements:

- Node Js should be installed in the user's machine.

External Packages:

- Express
- Mongoose
- Body parser
- Cors.

Technologies:

- HTML
- CSS
- Java Script(jquery).

Key Concepts Involved:

- Working with database.
- Adding items.

While doing I got an error in this project(in database) my main idea to show the item and its image and price .I need some time for to sort it out.

Project Done By:
